Great New Gear You Gotta Get

Walking through the New Product Showcase at ICAST sportfishing tradeshow, the quality and quantity of new goodies available to kayak anglers had my gear head spinning. From indestructible haulers to impervious waders to cool clothes, flashy electronics and smart tools, I left a trail of gear drool all over the convention center floor. Here's the good stuff you gotta get for kayak fishing.

Yakima

I was excited to see Yakima at ICAST in hopes that their first year at the sportfishing tradeshow is a sign that they're bringing their indestructible and intelligent gear-hauling expertise to my favorite sport. In fact, they've already introduced a new truck bed extender at the New Product Showcase. The extender is built of square, aluminum tubing to be light and tough. Best of all, it can be set at three positions: open tailgate, closed tailgate and even extended to support a load on a roof rack. As expected, this is the last bed extender you'll ever have to buy.
