YAKIMA HITS THE WATER WITH GUNS BLAZING

WRITTEN BY RIC BURNLEY

The auto rack giant has entered the fishing market with guns blazing. Recognizing the popularity of kayak fishing, the biggest name in auto racks and trailers is pouring its energy into designing transportation solutions for paddle anglers. As expected, their new Easy Rider High trailer is built tough for a soft ride.

Oversized tubing and a two-level rack system allow anglers to load kayaks and gear on any of their rack systems. Their famous pneumatic shocks maintain a soft ride that won't damage gear. Kayaks can be loaded on the lower or upper bunks and the trailer is light enough to be towed by any vehicle. If you whip a pickup truck, check out the new load bar. We love that it can be set in three positions to hold the kayak with the tailgate down or up.
