## HOT NEW FISHING GEAR NOVEMBER, 2017

Editor's Note: We wish we could personally test every item that appears on these pages, but that simply isn't possible. So that you know the difference between when we've physically tested a piece of gear and when we're writing about it because it's newsworthy and we think you'll want to know about it, we've developed the FishTalk Tested button. When you see "FishTalk Tested" next to something in this section, it means we've personally run it through the wringer.

### YAKIMA LONGARM BED EXTENDER

If you have a kayak, canoe, or small boat you shove into the back of a pick-up, the Yakima Longarm Bed Extender might be of interest. The 12-pound aluminum rack fits a two-inch ball hitch and can be adjusted for both length (up to four feet) and height. It can support up to 300 pounds, and can also be mounted in a vertical position to support the aft end of car-toppers or boats carried on top of a truck cap. Price: \$219. For more info check out our video preview at the [FishTalk Magazine YouTube channel](#), or visit [yakima.com](http://yakima.com).
